

STS-Hub.de 2023 Conference Publication Submission Notes

The editors

This publication is edited by Ingmar Lippert (University of Frankfurt) and Lisa Wiedemann (Helmut-Schmidt-Universität).

Review

We will conduct reviews of all submissions.

Style and content of writing

The style is quite open. We especially welcome discussions of panels. We invite, too, short or long notes on substantive research. For more suggestions for submission, see our letter. Don't hesitate to get in touch with and propose other contents that were shaped by the STS-hub.de.

If your contribution engages with other contributions to the STS-hub.de, we encourage you to cite the abstracts (the numbers won't change, in the expected publication (compared to the conference programme) so you do not need page numbers). See the Submission requirements, below, for an example.

License and publication

You shall allow us to publish your submission free of charge licensed via Creative Commons (CC BY-SA 4.0). In your email submission to us, publication@sts-hub.de, by default, please ensure you grant us this license to publish your submission.

We suggest you copy and paste the following formulation in your email to us.

(a) Herewith I declare that I own all proper rights or licenses for all writing and images used to create the content submitted for the Publication. (b) I give the editors the right to produce, publish, and distribute the submission as Open Access under a Creative Commons BY-SA license.

We plan to publish this book on the electronic publication server of Goethe University at Frankfurt am Main.

Submission requirements

Format

Your submission should be a **plain text file** (txt or md, aka markdown, sorry, doc, docx, odt creates too much fuzz). Separate paragraphs with two line breaks.

Mark the title with a hash sign, #, first level headings with ##, second level headings with ###, and so on.

Normally, you should not need **bold** text, but if you do need, please start and close a bold segment each with **, and you can emphasise or produce *italics* with a single opening and closing asterix, *.

Avoid **footnotes**. If you need a footnote, write them out within one paragraph, insert its beginning with an ^[and end the footnote by an].

Include **image** files in this way: ![This is your STSy image's caption \label{mylabel}](example.png) This code allows you to reference the figure later in your manuscript, as in: See \autoref{mylabel}.

We ask you to manually implement an **author-date citation style** (Author Year: Page), ideally following the Chicago Manual of Style. So, for instance, you might explain that Smit (2023) discusses semantics in epistemic politics, and you would reference this abstract with Smit, Jorrit P (2023) "Dazed and confused in the ecosystem - Ecological metaphors & the politics of knowledge production". In: Lippert, Ingmar and Wiedemann, Lisa (editors) *STs-Hub.de 2023*. #72.

Here is an **example code** for the opening of a sample submission.

```
# STS-hub.de 2023 -- a geeky exercise?
Toni Wonders, University of Dreamlands, Department of Hope, ORCID

## Introduction
In which we learn about *footnotes*.^[STs footnotes are easy to
code, but should still be avoided.]
```

Which turns into the subsequent text, visualised as Figure 1.

STs-hub.de 2023 – a geeky exercise?

Toni Wonders, University of Dreamlands, Department of Hope, ORCID

Introduction

In which we learn about *footnotes*.¹

¹STs footnotes are easy to code, but should still be avoided.

Figure 1: This is your STSy image's caption

Communication with us

Please define one corresponding author, who is managing your submission's files.

Content

Start your submission with a title. In the next paragraph, provide your name (really no need for personal titles), affiliation and ORCID, followed by two blank lines. Please provide a footnote with an email address for the corresponding author.

Deadline

The deadline for submissions is the **6th of October 2023**. Please contact us early with an alternative timeline, if you commit to contributing but need more time. We are happy to adapt the timeline.

Questions?

Please write to Ingmar Lippert, and patiently wait for up to 7 work days for a reply.
